CURRENT RESEARCH

Q angle Measurements of Intercollegiate Baseball Pitchers and Position Players

Primary Investigator

- The purpose of this research is to investigate if a difference in Q angle measurements exists between the lead and trail legs of intercollegiate baseball pitchers and position players as well as between the lead leg of pitchers and position players as well as the trail leg of pitchers and position players. The impact of the Q angle on pitching accuracy, precision, and velocity is not known.
- Providing oversight and coordinating two data collection sites including the University of La Verne and Southeastern Louisiana University.
