

## **Spine Posture & Movement Study**

### Mobile Sensor Technology

Are you interested in participating in a research study to examine **spine posture and movement** using **wireless mobile sensors**? Participation is **voluntary** and involves two sessions in which you will be asked to complete a series of questionnaires, perform simple postures and trunk movements, and then wear a mobile device on your lower back for 8 hours during everyday activities on two separate days.

To be **eligible for participation**, you must meet the following criteria:

- Between the ages of **18-65**.
- **Chronic low back pain** (for at least 3 months) OR **no history of low back pain**
- **No history of** spine surgery, tumor, or infection; no history of chronic widespread pain or fibromyalgia.
- **Not currently pregnant** or may be pregnant.

We are able to provide \$50 compensation for participation in each session.

If you are interested in learning more about the study and would like to determine whether or not you are eligible, **please contact**:
